Product Bulletin # PC-040 v 1.0	

New Remote Controller Offerings

Canrig will soon offer the following products, manufactured by Cavotec, for PC3000 and PC4000 Catwalk models:

- Gen1 remote controller upgrade
- New Gen2 remote controller

Gen1 Remote Controller Upgrade

Canrig will provide an option to upgrade existing Gen1 controllers. This upgrade will include “tilt detection” to prevent unintentional remote operation. For further details contact your Field Service Representative or Account Manager.

New Gen2 Remote Controller

The new Gen 2 remote controller will become available in Q2 of 2020. There will be two options available:

- New remote controller (Canrig P/N: AY51768) will be available as an upgrade package. This option only includes the new remote controller and it’s compatible with a range of existing base units.
- New design purchase (Canrig P/N: AY52184). This option includes the new remote controller and base unit. This option is recommended for systems with older base units.

Note: Contact your Field Service Representative or Account Manager to determine if your existing base unit is compatible or upgradeable for use with the Gen2 terminal.

Gen2 Prototypes Available

Contact Canrig if you’re interested in ordering a prototype of Gen2. At the time of publication, there are limited amount of units available. These prototype units can be later upgraded with the “instant pairing via cable” function in Q2 of 2020.
