

ILLUMIC™: Shining Bright in Saudi Arabia

Canrig installed the ILLUMIC™ lighting system across 19 rigs in Saudi Arabia for a major customer to enhance workers' visibility and illuminate the worksite.

Installing the ILLUMIC lighting system enabled each rig to save up to 213 kWh of energy and 29 gallons of fuel per day when not using traditional diesel powered light towers, resulting in substantial cost savings and contributing to more safer, efficient and sustainable operations.
