

PACE[®]-S

Rig Series Highlight

The PACE[®]-S fleet is optimized with a slingshot design for quicker rig moves and a substructure that can rig up without main rig power.

Features

Advanced Walking Capabilities

Ideal for large, non-standardized well pads, the PACE[®]-S rigs feature efficient, more advanced walking capabilities for multi-well pad drilling.

Safer, Efficient Operations

Reduce manual handling activities with enhanced safety features such as:

- User friendly rig up and rig down for quicker rig moves
- Cantilever mast eases rigging and transportation
- Slingshot design reduces the number of loads
- Remote operated hydraulic catwalk with a walking system eliminates the need to reposition equipment between wells on a pad

Automation and Controls

Equipped with Nabors SmartROS[®] rig operating system, drillers can deploy Nabors' full suite of industry leading performance tools for advisory, process and directional automation to optimize performance and workflows, reduce human variability, and deliver consistent and repeatable operations. Standard on all Nabors' rigs, our upgraded autodriller enhances operational efficiency with precise WOB and differential pressure control, achieving higher ROP and significantly reducing bit wear.

S-Series Fleet Specifications

<i>Feature</i>	PACE[®]-S
Drawworks	2,000 HP
Mast Rating	750,000 lbs
Setback Capacity	700,000 lbs 26,000 ft @ 5" Drill Pipe and higher capacity available
Substructure	Slingshot, Hydraulic
Walking Capacity	Walking System 120 ft Minimum – More Available
Top Drive	500 Ton AC High Torque – 51,400 ft-lbs Torque Rating
Engines / Generators	4 x 3512 Engines 1,365 kW Generator
Mud Pumps	3 x 1,600 HP AC 7,500 psi Mud Pressure
Pipe Handling	Remote Operated Wrench – 80,000 ft-lbs minimum – TM100 and TM120 Available Remote Operated Hydraulic Catwalk Rotating Mousehole
